Lesson 2: Modeling and Statistical Analysis In this lesson, students transfer a two-dimensional representation to a three-dimensional solid model with technology. Students study basic geometric shapes within a mathematical model and use combinations of geometric primitives to form more complex shapes. During the design project, students work in teams and apply the design process to create a ...

If the Actual Buzzer Output column matches the Expected Output column, then your first combinational logic circuit works. Congratulations! Print a copy of your circuit and put it in your engineering notebook. If the Actual Output does not match the Expected Output, review your circuit diagram and the design specifications that you defined.
