William W. Hay was born December 10, 1908, in Bay City, Mich. By virtue of his education and practical experience in his profession of railroading, he became the academic leader in railroad engineering for more than a quarter century. Hay graduated from Carnegie-Mellon University with a B.S. in Management Engineering in 1931.

William Hay | Civil and Environmental Engineering

A rail fastening system is a means of fixing rails to railroad ties (North America) or sleepers (British Isles, Australasia, and Africa). The terms rail anchors, tie plates, chairs and track fasteners are used to refer to parts or all of a rail fastening system. Various types of fastening have been used over the years.

Free Download Here - pdfsdocuments2.com

A revision of the classic text on railroad engineering, considered the ``bible'' of the field for three decades. Presents railroad engineering principles quantitatively but without excessive resort to mathematics, and applies these principles to day-by-day design, construction, operation, and maintenance. Relates practice to principles in an orderly, sequential pattern (subgrade, ballast, ties ...
