Renault K4j 750 Engine - laylagrayce.com

There seems to be a lot of posts relating to timing belts on the K4M 7** engines, so thought i would knock up a guide on how to do it. Images / diagrams (freely available on the net) are at the end of the thread. freely available but still copy protected, and as such there use is against RF rules This is just a basic belt change, not a snapped cambelt how to (which will come next!)

How to: Timing belt on K4M / K4J - Renault Forums ...

F Renault engine (F for fonte, French for cast iron) is an automotive internal combustion engine, four-stroke, inline-four engine bored directly into the iron block, water cooled, with overhead camshaft driven by a timing belt, and with an aluminum cylinder head, developed and produced by Renault in the early '80s, making its appearance on the Renault 9 and 11.

Renault F-Type engine - Wikipedia

Hello! My Megane with a K4J engine, manual gearbox, stalls when I push the accelerator quickly, especially from idle, or when rolling towards a roundabout and the accelerating. I must then let go of the accelerator, and push it gently. Mechanic's Assistant: Is the check engine light on? Does the car stall at idle or when driving?

The Renault K4J (1390cc 16v) and K4M (1598cc 16v) engines once it has been subject to a timing belt failure develops a tendency to snap valves when re-assembled. The only way not to minimize this is to disassemble the head completely, check the cylinder head for any damage and cracks, replace all valves, valve guides and hydraulic lifters.
