When Piper Aircraft announced its plans to build a big-cabin turboprop in late 1977, time was of the essence – only, we didn't know it. It took another three years to get the airplane certificated, during which time the robust state of the general aviation manufacturing economy had begun to unravel. The Cheyenne III's main Read More

The Piper PA-31 Navajo is a family of cabin-class, twin-engined aircraft designed and built by Piper Aircraft for the general aviation market, most using Lycoming engines. It was also license-built in a number of Latin American countries. Targeted at small-scale cargo and feeder liner operations and the corporate market, the aircraft was a success. It continues to prove a popular choice, but ...
