Sap Solution Manager Diagram

Pools and processes. In SAP Solution Manager pools typically represent processes. The lanes then represent the different process participants. To use pools you can choose from three different flavors of pools. You can use. Current Process, Pool / Draft Process, and. Pool / Blackbox Process.

Collaboration and process diagrams - Solution Manager ...

Universal diagrams are used to model different sorts of diagrams including value chain diagram, capability maps, application landscapes, process landscapes, or any other kind of diagram. The universal diagrams don't follow given, strict semantics (in opposition to the BPMN collaboration and process diagrams) but allow the user to just describe graphically what he wanted to describe.

Universal diagrams - Solution Manager - SCN Wiki

SAP Solution Manager 7.2 allows to describe processes graphically using BPMN 2.0 process and collaboration diagrams. With process diagrams you can describe the internal flow of activities (process steps). You choose diagrams to improve your process communication. BPMN helps diagrams to maintain a unified language to communicate processes.
