Finally! Here is the tutorial for these simple engineering print portraits you've been asking for. I love what a statement the engineering prints make in any room and at under \$14 a piece (including the frame), the price can't be beat.

\$14 Engineering Prints For Your Walls (frame included ...

For the purpose of engineering prints this look might be ok (as the blueprints can have a sort of not-so-crisp feel anyways), and you can probably get away with printing at 150dpi. However, if you start with a HUGE image (like the size of a wall) that is at 72 dpi, and work with the right ratios, you can end up with a true 300dpi image.

Try This: Color Engineer Prints! - A Beautiful Mess

Glad you asked. Here's the skinny on the big pictures. For those of you who haven't heard of engineer prints, they are HUGE prints for extra cheap. They only come in black and white, and on thin thin paper. I bought ours at Staples. The 24" by 36" print was \$3.29. Here's a breakdown of their sizes and prices: 18" by 24" \$1.69

What You Should Know About Engineer Prints | Interiors by Kenz

3D Printing - Engineering

Dos and Don'ts for the Engineering Print. Next, the instructions said to paint the sides of the Styrofoam black, since it will be visible on the side. Um, that'd be fine if the edges were smooth, or straight, or remotely ready for public consumption. Not the case. So I had an idea. Black duct tape. I'll tape a frame around the edges of my picture.
