Rattling Sound In Engine

Piston Slap. When the engine is cold, the piston may produce a rattling sound. The noise typically goes away once the engine reaches operating temperature and the piston expands. Piston slap is more of an annoyance than a true problem, and a permanent repair would require an overhaul with oversize pistons, costing up to thousands of dollars.

How to Fix Car Engine Rattling - ThoughtCo

6. Cracked Engine Accessory Bracket. A mounting bracket is used to support the various accessories such as the power steering pump, air conditioner compressor and alternator. If the bolt becomes loose or the bracket breaks it can cause a rattling noise. These brackets can be both cast or stamped steel.

How to Fix Engine Rattles in 20 Minutes or Less

Choose your car for a more accurate estimate. There are several causes for the engine to rattle while idling. With your car, the heat shield or an under engine shield is most likely. The other causes are the AC compressor clutch, idler pulley, or belt tensioner. The heat shields are used between the exhaust and the underside...

Engine Rattling Noise? (EASY FIX!!)

Detonation, Pre-ignition (Pinging) Noise. This noise is caused by an air/fuel mixture in the engine cylinder being ignited prematurely by the heat of compression as the piston is moving up on the compression stroke. If ignition happens before the piston reaches the top of its stroke, this is called pre-ignition or pre-detonation,...

Diagnosing Common Engine Noises - James on Engines #3

A rattling sound came out of the engine for about 2 to 3 seconds. Then everything was fine. I know it is the lifters running out of oil when standing for a long period of no starting. My car has 22k miles on it. My question, is there any way to prime the engine before starting after a long vacation?

Rattling sound in engine - Mercedes Benz SLK Forum

Engine Metallic Rattling Noise (EASY FIX!)

Noise from the valve train. The valve train is the system in your engine that's driven by the camshaft and opens and closes your engine's valves. The valve train allows fuel into the cylinders and lets the exhaust gases out. The valve lifters are the components that do the actual opening and closing of the valves.

Why Your Car Is Making a Rattling Noise, and What to Do

V-Belt Pulleys. The speed of these pulleys escalates with the engine speed. If they are slightly bent or loose, the metal-on-metal contact will create terrifying rattling sound with acceleration. Open the hood and inspect the V-belts when the engine is off and running. If a pulley is bad, the belt will show damage in the form of frayed sides.

What Are the Reasons for Rattling Noise When Accelerating?

A sudden rattling sound appeared in the engine of my 2002 Corolla and I pulled over. The oil light

was on. I probably did not notice it earlier. The engine starts except that it makes this rattling noise. The oil was extremely low, maybe just upto the tip of the dip stick. The engine has ~100,000 miles and I had just done an oil change a month ago.

Rattling sound in engine - 2002 Toyota Corolla

Full Answer. Another problem could be a loose timing chain. If so, the rattling is accompanied by ticking or slapping sounds at the front of the engine. The noises also get faster and louder when the engine is revved. Thumping during acceleration can indicate broken engine or transmission mounts. If a loose part is suspected, consult a mechanic.

Why Is My Car Making a Rattling Sound? | Reference.com

Engine making rattling noise 04-13-2015, 02:20 PM. When going up hill, there is a rattling noise coming from the front of the engine. It is more noticeable in 3-5 gears. My RPMs are normal for the grade and the speed. This has started about 6 mo. ago and not getting better. This is not the alternator sound.
