Decoro Design steel panel radiators are designed to be installed in closed hydronic heating  
systems, with a maximum operating temperature of 250° F. If the heating system contains  
antifreeze, the proper Ph must be maintained. High acidity will damage the radiator and void the  
manufacturer's warranty.

Panel Radiators. Panel Radiators can help save money by operating on lower supply temperatures

than conventional baseboard heat. Panel Radiators are available in a two models: Model 21 is 2.5" thick, Model 22 is 4" thick; Panel Radiators are cleaner, quieter, and provide a more consistent comfortable source of heat

**Buderus Panel Radiators - Bosch Climate**

automobile radiator. Current radiator designs are limited by the air side resistance requiring a large frontal area to meet cooling needs. This project will explore concepts of next-generation radiators that can adopt the high performance nanofluids. The goal of this project is to design an advanced concept for a radiator for use in automobiles.

**High Efficiency Radiator Design for Advanced Coolant**

These radiators are a two-row design with 1-inch tubes, and come with a machined-aluminum filler neck welded into place. For a person who is willing to do some simple mount fabrication, these ...

**How to Design And Build A High-Performance Cooling System**

Our all aluminum generator radiators use one of the thickest radiator tubes on the market today. By using .0157 walled tube, a fin thickness of .006, and header thickness of .075 you can be assured that the generator radiators built by C, G, & J Inc are made to last. In addition to manufacturing radiators ourselves here in the U.S.A., we specialize in custom built all aluminum radiators.

**Generator Radiators - C,G, & J Inc.**

The size of the radiator (and thus its cooling capacity) is chosen such that it can keep the engine at the design temperature under the most extreme conditions a vehicle is likely to encounter (such as climbing a mountain whilst fully loaded on a hot day). Airflow speed through a radiator is a major influence on the heat it loses.

**Radiator (engine cooling) - Wikipedia**

Radiator Design Considerations Radiator cooling is the most common method of cooling genset engines. Simple and practical, they fit most applications' needs. All Cat gensets can be equipped with various sizes of radiators mounted on the front of the unit. However, remote
