I looked at found variable answers. B+S says it depends on the equipment. I would like to know the rpm, under load. I plan to replace the gas engine on my chipper shredder with a 3600 rpm electric motor and I need to get an idea on pulley size. I see engine rpms ranging from 1600-3200 for single ...

At work, I wear many hats. One day I got stuck with repairing the starter on our forklift, also a clark. The engine is a Continental F-140. The Delco starter is pretty much the same as what was used on older GM cars, except for the mounting flange and a slightly longer armature shaft and end snout.
