A carburetor (American English) or carburettor (British English) is a device that mixes air and fuel for internal combustion engines in the proper air-fuel ratio for combustion. It is sometimes colloquially shortened to carb in the UK and North America or carby in Australia. To carburate or carburet (and thus carburation or carburetion, respectively) means to mix the air and fuel or to equip ...

updated 11-19-2014 . High Mileage Carburetors. Many of us have heard that there were people years ago, back in the 60's(?), who developed very efficient "carburetors", that ran on fumes and got 100 mpg or more. I do remember an article in Popular Mechanics back in the 1960's which even got the cover photo for the month, telling about a guy who built a carburetor for his sedan which ...

The next illustration represents the High Speed Circuit. One thing is important here. Contrary to the belief that the LO circuit is active only at low RPM and the Hi at high RPM, BOTH circuits are active at high RPM as seen below. On the same token, even at low RPM, opening the HI screw will affect the mixture somewhat (it is partially active)
