About the Pedagogy. This resource provides students with an ecliptic and top view of Earth's orbit around the Sun. The resource also displays the distance between Earth and the sun for each month, which allows students to discern that Earth is closest to the sun in the dead of winter in the Northern Hemisphere.

The Phases of the Moon simulation lets you view the action in fast forward. It gives you two interlocked views of the Moon as it goes through its phases. One view is the Moon rising and setting over a pasture in the Northern Hemisphere - maybe in Wyoming. The other view is from space, above the North Pole, looking down on the Earth/Moon system.
