Proton (Russian: Протон) (formal designation: UR-500) is an expendable launch system used for both commercial and Russian government space launches. The first Proton rocket was launched in 1965. Modern versions of the launch system are still in use as of 2019, making it one of the most successful heavy boosters in the history of spaceflight.

There was a time when people would have found it hard to believe that Malaysia could develop a successful sports car company. Not only has Proton been successful operating out of Malaysia, it has done well enough to be able to buy out a luminary like Lotus. A publicly owned company, Proton has managed to produce some very fine cars.
