Okay. After about two weeks listening to tutorials, reading the manual, etc, I have learned how to program the PMDG FMC. I can put in and have the plane follow the flight plan with all the legs. BUT, along with each leg you also put in the speed/altitude for each leg, as in Curle 240/5000, next ACT 330/20000, and theron to my destination.

The true FMC was introduced with the 737-300 in 1984 this kept the performance database and functions but also added a navigation database which interacts with the autopilot & flight director, autothrottle and IRSs. The integrated system is known as the Flight Management System (FMS) of

which the FMC is just one component.
