The MZ is a fine engine - the reports of the MZ being a bad engine come from 12 years ago with disgruntled PPC owners who didn't know how to tune the carbs. ( Rotax has the same problem - they just did a better job of addressing it) It is true that the owner is not a salesman and there is not a distribution network.

When the Rotax 337/447/503 are used in an upright installation, a gravity feed system is used to supply oil to the crankshaft main bearings through channels in the crankcase. While oil is still supplied to these bearings in an inverted engine, it is being supplied by internal engine pressure rather than gravity.
