Answer Wiki. Most programs still do process design exclusively- where you will design some type of chemical plant. Often these designs tend to be "smaller scale" and less complex, but also newer and reflective of a changing market trend. That's what they do. What they should do, in my opinion, is add an integrated product design element.

### **What are project topics for chemical engineering? - Quora**

The project ideas for a btech project in chemical engineering can be broadly divided into two categories : A theoretical project is good in comprehensively enhancing your fundamentals of chemical engineering. Generally in such a project you basically design a chemical plant. You choose your product and check its techno - economic feasibility.
