Got Oil in Crankcase Breather Hose? Try This

Yeah, the moisture from the oil gets mixed with the oil vapour mist and you get ski yoghurt in your breather pipe. The Polo engines all have lots of oil mist, from being brand new, its nothing to worry about and is caused by the upper cylinder lubrication. Basically, there is a controlled amount of blow-by as gasses are exchanged for oil in the ...

Amazon.com: engine breather

In an internal combustion engine, a crankcase ventilation system (CVS) is a one way, pressure-sensitive passage which allows the natural build up of gases to escape from the crankcase in a controlled manner.. Blow-by, as it is often called, is the result of combustion material from the combustion chamber "blowing" past the piston rings and into the rotating assembly's housing.

Crankcase ventilation system - Wikipedia

VW Polo 1.2 E 2003 - 1.2 Polo Disapeering oil. Bought this car on wednesday 2nd. 81,000 miles, 1 owner. Had been serviced by dealer prior to sale. 1 month warranty. Seemed to be running lovely and I clocked up about 200 miles or so till friday night when the oil light came on. Luckily I was close (300yrd) from my destination so I didnt drive it for long after this.
