No matter what engine mount you fit, they all locate the engine in the same position. As I said, the cross member is the key. For example, the Cefiro one will drop the engine lower in the engine bay. Also, yes the mounts vary but not by much. So also have notches for oil lines or for turbo routing, etc.

If the engine or transmission mounts break in your vehicle, you'll want to replace them quickly. An unsecured engine tends to jump when you press the accelerator and cause damage to belts, axles or hoses, resulting in costlier repairs. You can easily change your own motor mounts if you know where they're located.
