Application. This unit describes the performance outcomes required to test engines using a dynamometer. The engines being tested may be in a vehicle or stand alone.

training.gov.au - AURMTE001 - Test engines using a dynamometer

I was driving back from a trip on my CL200 when something broke in the engine. A loud ticking

noise suddenly appeared. It was in sync with the RPM (at idle it was around 200 beats per minute, at high rpms it became a constant chatter) and it sounded like it was coming from the head, maybe the right side.
