Single crystal silicon is unique. It is both the foundation of the global microelectronics-based economy and a model material. Although the word “technology” today is associated with the internet, wireless devices, social media, software coding, and “apps,” all these are enabled by dislocation-free single crystal silicon.

Silicon single crystals - ScienceDirect

sensors for molten metal applications, liquid steel level sensors for continuous casting, slab and bloom machines, level sensors for various casting process of non-ferrous metals, measure the metal level inside a holding or melting, furnaces, X-ray inspection systems, radiosopic equipment, computed tomography for castings

IPC TM-650 Test Methods Manual

Programmed Data Processor (PDP), referred to by some customers, media and authors as "Programmable Data Processor, is a term used by the Digital Equipment Corporation from 1957 to 1990 for several lines of minicomputers. The name "PDP" intentionally avoids the use of the term "computer" because, at the time of the first PDPs, computers had a reputation of being large, complicated, and ...
