This may be a silly question, but is it standard procedure to have to use the shift override button to get out of park, or is that an indication of a malfunction from the key switch? It has been this way since I aquired the car two months ago and as far as I know, the person I got it from never questioned it from the original owner.

Is the override manual? The solenoid generally moves a little lever that blocks the shift selector. An "override" usually means there is a way to manually move the lever. I had to fix up my own interlock once. The root issue was basically that over the years lots of "goo" had gotten down into the center console and gummed up the works.
