Hello, My Kenmore Series 90 washer recently began having troubles spinning. I ended up pulling it apart and replaced the agitator dogs, motor coupler and the washer drive. However, that didn't seem to fix the problem. The washer still doesn't always spin (on occasion I can get it to work) and now it seems to have trouble draining the water from the tank.

If you're considering buying a used Kenmore washing machine, be sure to confirm the machine's age. According to a 2007 study by the National Association of Home Builders and Bank of America Home Equity, the average life expectancy of a washing machine is 10 years, so it's important to know exactly how old the washer is before purchasing it.

I have a Kenmore Series 90 washer that has a small water leak. It appears to be coming from the middle, slightly back and to the left. It's pretty small but I will need to eventually fix it. I haven't figured out how to take the cover off and try running it with the cover off yet. Is there some common areas to look for? Thanks.

Avoid using too much detergent for the load to reduce the amount of build-up that clogs up or coats the inside of your washer. Use the amount instructed on your detergent to get clothes clean and let the washer thoroughly rinse the excess soap from the fabrics. Browse Sears PartsDirect to find a large catalog of parts for your Kenmore washer.

Kenmore is a Sears brand under which a variety of home appliances are sold, including a wide range of laundry washing machines. The Kenmore 80-series product line, released throughout the early 2000s, had washing features that were advanced for its time. However, even the best washer can malfunction.

"I would not recommend the Kenmore 90 series gas tumble..." Written on: 30/01/2006 by lucysgirl (1 review written) I would not recommend the Kenmore 90 series gas tumble dryer. Last year I replaced the motor. It is poorly designed poorly because it is very hard to remove the lint build-up inside the machine.

Our Sears Kenmore "90 Series" washer will not spin. It makes sounds like it is "trying to spin", but the drum will not turn. It had gotten almost to the end of the "drain & spin" cycle, and then stopped. I'm guessing it is some sort of relay from the control module to the "spin motor", or perhaps a malfunction with the control module itself.
