Math 632 is a course on basic stochastic processes and applications with an emphasis on problem solving. Topics will include discrete-time Markov chains, Poisson point processes, continuous-time Markov chains, and renewal processes.

Math 632 - Introduction to Stochastic Processes

stochastic processes. Chapter 4 deals with filtrations, the mathematical notion of information progression in time, and with the associated collection of stochastic processes called martingales. We treat both discrete and continuous time settings, emphasizing the importance of right-continuity of the sample path and filtration in the latter ...
