The Roto-Jet® pump is a single stage pump with only two basic working parts: the rotating case and stationary pitot tube. Under normal working pressure the only wearing part is the mechanical seal which encounters only suction pressure. Seal leakage due to seal failure vents to the atmosphere; the seal is isolated from the bearing pedestal, minimising the risk of seal leakage contaminating ...

### **ROTO-JET® High Pressure Pitot Tube Pumps**

The Roto-Jet® pump is a single stage pump with only two basic working parts: a rotating case and a stationary pitot tube. The mechanical seal of the Roto-Jet® pump is subject to only suction pressure, whereas many other pump seals are exposed to elevated seal chamber pressures producing a potentially higher fail rate.
