Decision-making using probability In this chapter, we look at how we can use probability in order to aid decision-making. 6.1 Expected Monetary Value Intuition should now help to explain how probability can be used to aid the decision-making process. For example, suppose we're considering launching a new product on the market.

Chapter 6 Decision-making using probability

Most every business decision you make relates to some aspect of probability. While your focus is on formulas and statistical calculations used to define probability, underneath these lie basic concepts that determine whether -- and how much -- event interactions affect probability.

Probability is likelihood that an event will occur. See glossary of probability and statistics. Probability quantifies as a number between 0 and 1, where, loosely speaking, 0 indicates impossibility and 1 indicates certainty. The higher the probability of an event, the more likely it is that the event will occur.
