Hi, Please help me fill out a list of manual geared scooters. I've looked at some of the vespa's, but most of them now are sold with a cvt. I don't want to tread on motorcycle ground, so anything looking like a CBR or ninja, even if it's chinese, or looking like a cruiser is considered a motorcycle.

I based this fear on my first experience driving a manual car with stick shift. Let's say things didn't go so well. So when it came time to hit the road on only two wheels, I was relieved to find out scooters work a bit different, and probably would be a better fit for a newbie like me. Yes, most modern scooters have an automatic transmission.

I think it is safe to say that there is absolutely no chance that Vespa will reintroduce a 2T manual shift scooter in the US. Your choices are the Stella (2T or 4T) or an older classic Vespa such as your P200. The PX150 was sold in the uS as recently as 2005 and low mileage (or even virtually new) scooters can be found.

There were only a few models of manual transmission scooters on the market. I'm very interested in the Genuine Stella 125cc Manual. But I'd like to be able to take this on the interstate as well. I know that modern scooter transmissions are reliable, more fuel efficient, have manual shift modes, etc. But I just have a thing for manuals.

Scooters, underbones and miniatures. Traditional scooters (such as the Vespa) still have manual gear-changing by a twist grip on the left hand side of the handlebar, with a co-rotated clutch lever. Modern scooters were often fitted with a throttle-controlled continuously variable transmission, thus earning the term twist-and-go.

**Motorcycle transmission - Wikipedia**

Modern scooters starting from late-1980s generally use a continuously variable transmission (CVT), while older ones use a manual transmission with the gearshift and clutch control built into the left handlebar. [citation needed] Scooters usually feature bodywork, including a front leg shield and body that conceals all or most of the mechanicals.
