Engine overhaul because of a noise?? I'd be very cautious and ask around for some second opinions. On modern engines it's very rare. Most relevant reason for an engine overhaul is loss of compression, which results in less performance and potentially could damage the engine some more, due to unbalance. If your engine uses a lot of oil? Check compression/blow by. If that's ok, why bother, filling a liter of oil every 500 kilometer is a lot cheaper then overhauling an engine.
