way. This paper has solutions to some of the problems I was able to solve, indeed many of the problems in this book were too chal-lenging to solve in a weekend. All of these problems were selected from Principles of Mathematical Analysis[1] by Walter Rudin. Contents 1. The Real and Complex Number System 1 2. Basic Topology 1 3.

Solution: No. Suppose  $M$  be a  $\sigma$ -algebra on  $X$  which has countably in- nite members. For each  $x \in X$  define  $B_x = \bigcap_{n \in \mathbb{N}} M_n$ . Since  $M$  has countable members, so the intersection is over countable members or less, and so  $B_x$  belongs to  $M$ , since  $M$  is closed under countable intersection. Define  $N = \bigcup_{x \in X} B_x$ . So  $N \in M$ . Also we claim if  $A \subseteq B \subseteq N$ , with  $A \in M$ , then  $A \setminus B \in M$ .

ABOUT THE AUTHOR. Walter Rudin is the author of three textbooks, Principles of Mathematical Analysis, Real and Complex Analysis, and Functional Analysis, whose widespread use is illustrated by the fact that they have been translated into a total of 13 languages. He wrote the first of these while he was a C.L.E.

Solution: Suppose there is an ordering defined on the complex field that turns it into an ordered field. Then, we get a contradiction to Proposition 1.18(d) on page 8 because  $i^6 = 0$  yet  $i^2 = 1 < 0$ , where  $1 < 0$  is forced by part (a) of the same Proposition. 9. Suppose  $z = a + bi; w = c + di$ . Define

$z < w$  if  $a < c$ , and also if  $a = c$  but  $b < d$ .

Hi all. I'm looking for a solutions manual or guide for Rudin's Functional Analysis. All I could find on Google were for Baby Rudin. I know that those over at /r/babyrudin have compiled a peer-edited solutions file. Does anyone know of anything similar for Functional Analysis, or of an actual solutions manual? Thanks.

Rudin would be especially tough to learn from for an independent learner. Rudin is a careful writer and does not lazily leave out details. But to learn from Rudin, because he is so brief and has so few worked out examples, you need to work through his proofs of theorems in detail, not just glance at them to get a general idea.
