Question answering (QA) is a computer science discipline within the fields of information retrieval and natural language processing (NLP), which is concerned with building systems that automatically answer questions posed by humans in a natural language.

Question answering - Wikipedia

\$\begingroup\$ This is a poorly worded question. I read (like you) that the engine exerts 40000 N on the train of wagons. What they should have said is that the net force on the engine and train is 40000 N, if the mass of the engine was involved. The only correct answer is to give both situations.

newtonian mechanics - Homework question about an engine ...

Solutions for all your small engine repair questions. Small engine repair is focused on, as the name suggests, the upkeep and restoration of combustion engines that power non-vehicular machines (aside from riding mowers, which count for both). These small-displacement engines aren't as big as those found in cars and trucks, but they can still ...
