Salary: Process Project Engineer | Glassdoor

What's the difference between a project and a process? I have a very broad view of what "project management" is but there is a danger of broadening the definition of a "project" and "project management" so far that almost anything could be a "project" and that would make it meaningless.

What's the Difference Between a Project and a Process?

Responsibilities of Process Engineers. A process engineer scales up a process from laboratory to production scale. The engineer will design equipment, install control systems, upgrade the processes and factor in environmental and health protection.

Differences Between Process & Manufacturing Engineers ...

Project vs Process : Defined. One way to look at is is that projects are things that you've never done before, whereas processes are things that we do repeatedly. A project is about creating something new or implementing a change, whereas a process is intended to create value by repeatedly performing a task.

Project vs Process : What is the Difference ...

For example, a project manager at an engineering firm may manage the migration process from one software platform to another. This project could last just three months. Once complete, the project manager would be assigned to another project. A complex project like the construction of a new high rise building or bridge could last for years.
