There are 2 major methods to configuring any VoIP phone, manually or using a centralized provisioning server.

### **Polycom Phone Setup - Phonism**

Revert Firmware and Wipe Configuration. The Factory Reset process performs two tasks: wiping the configuration data and reverting the firmware to the previously installed version.. It is important to understand that this process is not reverting the phone to the version of firmware that was preinstalled on the factory, unless the device has never been updated since it was originally installed.
