SD1 V8 Oil change "Rene Winters" procedure. Heat up the oil by letting the engine run for a few minutes, or drive a few miles. Place a container (more than 5-litre capacity) under the sump plug. Unscrew the plug and the oil will spurt out. After all oil is drained screw in the plug and tighten. Fill with at least 4-litres of oil the engine

From my side I would say, never use expensive oil (synth or half-synth), but p6club.com gives you the right oil quality advice. It's an engine from the 60s, so make frequent oil changes and do not use additives. If you have to go deeper and you are finally ending taking off timing cover and/or oil pump unit, google for "rover v8 oil pressure".

With the Rover V8, it is never, 'how many miles they have done' but how they did them. This is a typical low mileage engine, it is not uncommon to see such contamination on a ten-year-old or older engine that has covered typically less than 50K miles and has had only factory specified interval oil changes, but please don't let this put you off,

Back to the Rover V8 Section 1997 NAS Defender 90 4.6 Install and Repairs This 1997 NAS Defender 90 has come to us from New York for a number of repairs needed to get it road ready. This Defender suffers badly from an engine that was overheated and now needs attention. The bad news is that the engine needs to be replaced.

### **Defender 90 4.6 install - East Coast Rover**

The last "official" Rover P6 off the production line, registered VVC 700S, was built on 19 March 1977, following the launch of its successor - the Rover SD1 - nearly a year earlier. The SD1 was initially only available with a 3.5 V8 engine, with the 2.3 and 2.6 six-cylinder units going on sale in November 1977.
