CDL - VEHICLE FRONT, ENGINE COMPARTMENT, FRONT AXLE AND STEERING FORM A

A coolant leak could be almost anywhere, because of all the coolant hoses that surround your engine. Some coolant hoses (the heater hoses) go into the passenger compartment itself. But the most common place for a coolant leak is your radiator, and that will be located behind the grill in the very front of the car.

Coolant leaks must be found to prevent engine damage. Engine coolant flows through the radiator, radiator hoses, heater core, heater hoses and water pump which circulates the coolant throughout the system. As the cooling system ages it can leak which will allow the coolant level to drop and will cause the engine to overheat.
