Refurbishing the Heathkit SB-610 and The 610C-2 Makeover - Spring 2012 The Heathkit SB-610 Monitor Scope, although not as popular today as it was 20 years ago, is relatively inexpensive and available through Hamfests and Web-based auction sites. Not only can it check transmitter signal characteristics but also monitor signals from other stations when used in conjunction with a receiver.

SB-610 may wish to incorporate the modifications when they construct the kit. Transmitter attenuation switch This modification moves the transmitter attenuation switch from its present position in the center of the rear apron of the SB 610 to the front panel. The control becomes concentric with the present vertical gain control.

manual. The SB-610 vertical amplifier can be wired in one of three ways depending on the receiver's IF frequency and the planned usage. Table II shows the options for these alternate wiring choices. The untuned circuit is listed for 1 kc to 150 kc, operation, but the specifications mention its use between 10 cps and 455 kc. ...

Heathkit of the Month #60: by Bob Eckweiler, AF6C

610's manual. After adjusting ("peaking") the receiver IF transformer and the coils in SB-610, the scope worked, but the trace didn't have much vertical deflection, even with the 610's vertical gain control fully rotated clockwise. My remedy for the small trace was to build a tuned pre-amplifier using a 2N3904 transistor.
