I'm learning special relativity with the book Introduction to Special Relativity by R. Resnick, but unfortunately he doesn't provide answers to the questions (not problems). So I would like to ask you if you could correct some of my answers. 1. I don't see any reason why it couldn't. The speed limit ...

(relativity being too controversial then). Einstein wrote two theories of relativity; the 1905 work is

known as “special relativity” because it deals only with the special case of uniform (i.e. non-accelerating) motion. In 1915 he published his “general theory of relativity”, dealing with gravity and acceleration. Strange things happen in accel-
