Sap Jco Interface Manual - preview.thequeenshall.net
JCo makes it fairly simple to develop a client-side tool to retrieve an interface definition from SAP. This tip gives the code for a very basic interface lookup tool. The tool takes the name of an RFC or BAPI, retrieves the metadata structure for that interface, and builds an XML definition and an HTML table.

Building an SAP interface lookup tool with JCo
SAP JCo is a communication library, based on RFC which is an SAP interface protocol that simplifies the programming of communication processes between systems. The RFCs enable you to call and execute predefined functions in a remote system, or in the same system.

SAP JCo Introduction - SAP Netweaver Application Server ...
SAP JCO Interface. This question is answered. I am trying to post SAP function return data to a website. I have my function in SAP working properly, I also am able to execute the transaction in the workbench and see the data in a trace file. I would like to create a chart with the data and post it to a website.

SAP JCO Interface
The SAP Java Connector (SAP JCo) is a development library that enables a Java application to communicate with on-premise SAP systems via SAP's RFC protocol. It combines an easy-to-use API with unprecedented flexibility and performance. The SAP JCo supports both communication directions: inbound Remote Function Calls (Java calls ABAP) as well as outbound Remote Function Calls (ABAP calls Java).

SAP Java Connector - support.sap.com
Hello Everyone ! In MII 12.0 I was using SAP_JCo_Interface to call an RFC. However that option is not available in MII 12.1. So if I need to call an RFC to fetch any data from R/3 which action is to be used ??? Regards, Vaibhav Singhania

SAP_JCo_Interface in MII 12.1 - SAP Q&A
We have created a JCo Server interface using RFC modules in SAP to communicate with an external web based system. The SAP system calls the external application via tRFC and qRFC as needed from the business transaction. We have achieved high throughput b

JCo Server Load Balancing - SAP
JCO CONNECTION. First of all, let me explain what is a JCO connection? The JCO Connection or the SAP Java Connector is a middleware component that allows a JAVA application to call or communicate to any SAP systems and vice versa.. There are 2 types of calls that can be made to the SAP Server by the Sap JCO, They are. 1)Inbound calls (Java calls ABAP)

JCO Connection - Java Development - SCN Wiki - SAP
Often the counterpart on SAP ERP side is communication via IDoc. JCo Messages are used to transfer data in XML format. If SAP ERP is the communication partner usually BAPI calls are made via RFC. Schedulers are responsible to schedule and run transactions, queries, and other objects in SAP MII.
