Agile software development is an approach to software development under which requirements and solutions evolve through the collaborative effort of self-organizing and cross-functional teams and their customer(s)/end user(s). It advocates adaptive planning, evolutionary development, early delivery, and continual improvement, and it encourages rapid and flexible response to change.

A critical concept that motivates full-lifecycle testing is the cost of change. Figure 1 depicts the traditional cost of change curve for the single release of a project following a serial (waterfall) process. It shows the relative cost of addressing a changed requirement, either because it was missed or misunderstood, throughout the lifecycle.

Examining the Agile Cost of Change Curve
